CENTRAL INTELLIGENCE AGENCY Office of Current Intelligence 20 November 1962

CURRENT INTELLIGENCE MEMORANDUM

SUBJECT: Cuban Military Activity in Area Around US Naval Base

1. Photographic reconnaissance missions over Cuba have paid

- particular attention to the area around the US Maval Base at Guantanamo Bay. A review of the information from this source bereveals a significant amount of Cuban military activity within a 20 nautical mile radius of the base, but most if not all of the activity is of a defensive nature. 2. An anti-tank ditch was under construction on the northwest side of the bay in ____ and work on its extension proceeded Additional anti-tage ditches were also built mortheast of the bay during these months. __ three four-gun field artillery positions with support areas for each battery were built approximately ten miles built approximational such

 several additional such

 25X1 northwest of the base. positions were established and they were being revetted. eight newly constructed large gun emplacements or tank firing positions were noted in a wooded area 5.5 nautical miles north of the north-east corner of the base. The positions were unoccupied. A number of small personnel trenches
 - artillery emplacements. all these positions were observed to be inundated, presumably as a result of the heavy rains that had been occuring. Five days later they were no longer inundated, but appeared still unoccupied.

appear, mainly near the anti-tank ditch and around some of the

6. The most recent information provides no evidence of the construction of any offensive missile sites or other activity of a potentially offensive character within the 20 nautical mile radius of the base.
